01.

PRE-DESIGNING

Gathering initial project requirements and defining goals.

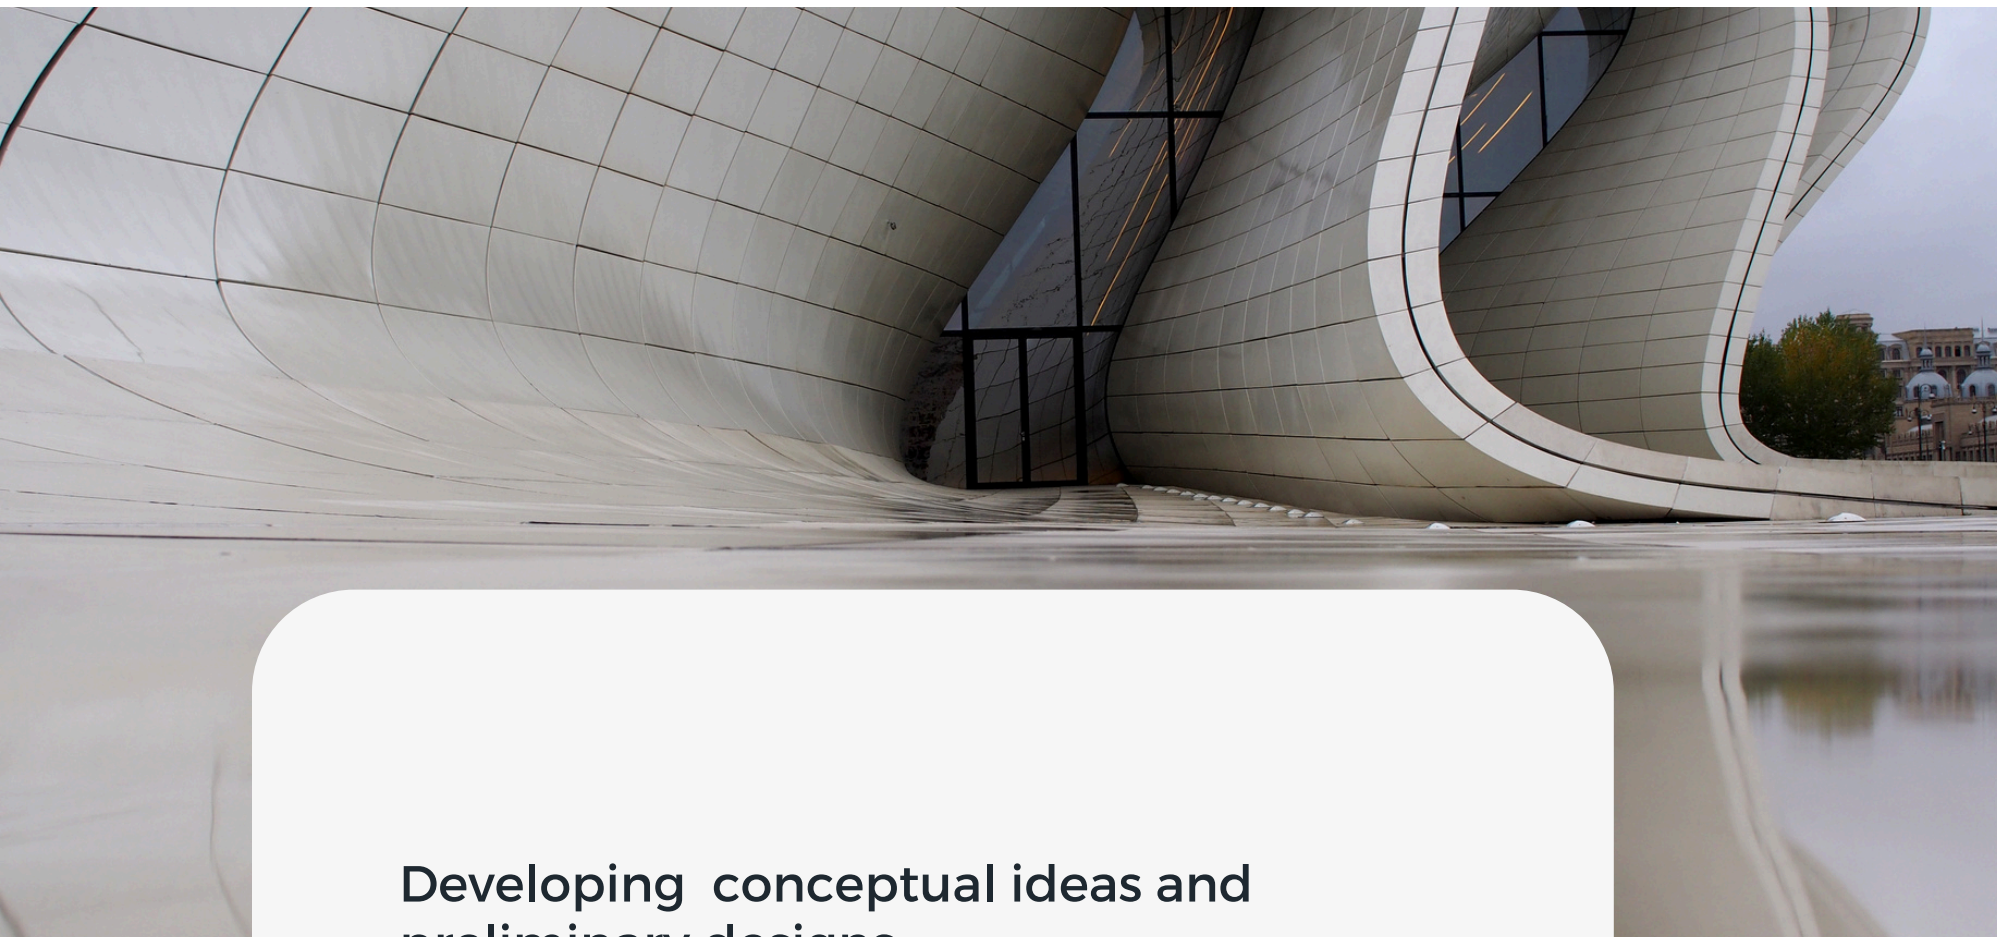

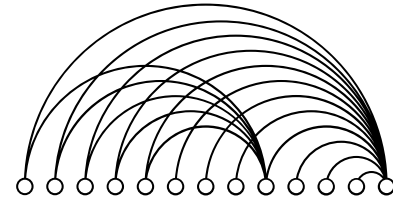

Site analysis, client interviews, feasibility studies, and establishing a project brief.

A comprehensive understanding of the project's purpose, constraints, and scope.

02.

SCHEMATIC DESIGN

Developing conceptual ideas and preliminary designs.

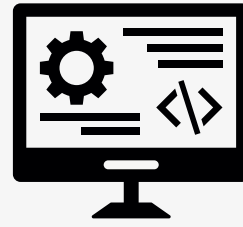

Create sketches, basic floor plans, and elevations to explore design possibilities.

Multiple design options are presented for client feedback and selection.

03.

DESIGN DEVELOPMENT

Refining the chosen design concept with more detail.

Developing detailed plans, sections, elevations, and 3D models, along with selecting materials and systems.

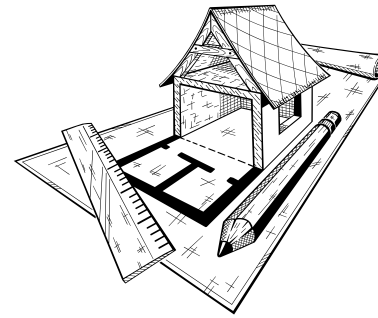

A well-defined design ready for further technical development, with initial cost estimates.

04.

CONSTRUCTION DOCUMENT

Preparing detailed drawings and specifications for construction.

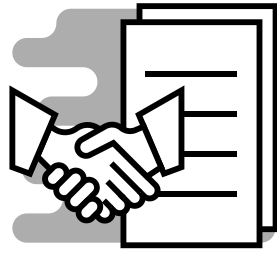

Produce comprehensive architectural drawings, technical specifications, and schedules.

A complete set of documents used for bidding, permits, and construction.

05.

BIDDING & NEGOTIATION

Assigning a contractor and finalize the construction contract.

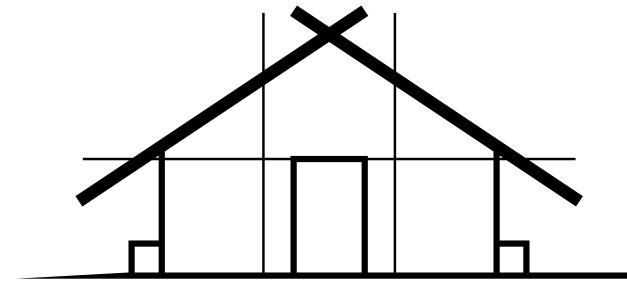

Issuing construction documents to contractors, evaluate bids, and negotiate terms.

A signed contract with a chosen contractor, ready to begin construction.

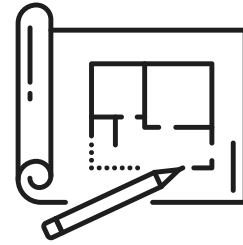

06.

CONSTRUCTION & ADMINISTRATION

- Oversee construction to ensure design intent is met.
- Site visits, reviewing submittals, addressing RFIs (Requests for Information), and managing changes.
- A completed project delivered according to design, budget, and schedule, with a final walkthrough and punch list.
